

REMARKS

The above amendatory action is taken solely for the purpose of avoiding claim fees that would otherwise accrue due to the presence of multiple dependent claims.

Respectfully submitted

Julian H. Cohen

THE UNIVERSITY OF CHICAGO

4. (amended) The sensor system according to claim [one of claims] 1 [to 3], characterised in that the aperture for the light from the earth is considerably smaller than the aperture for the starlight.
7. (amended) The method according to claim 5 [or 6], further characterised by model-based tracking of the rim of the earth.
8. (amended) The method according to claim [one of claims] 5 [to 7], characterised in that a long-wave fraction of the radiation is filtered out and used for determining the rim of the earth.
9. (amended) The method according to claim [one of claims] 5 [to 8], characterised in that the rim of the earth is determined by fitting earth models.
